

LIVEREGISTER

User Manager App Installation Guide

REQUIREMENTS

- ◆ .Net Desktop Runtime 6.0.8 (x86)
- ◆ Secugen Hamster Plus drivers from Windows Update

STEPS

1. Download the installer from <https://www.liveregister.uk/download/usermanager.msi>
2. Uninstall LRDrivers (if you previously installed them for enrolling in IE).
 - ◆ In Device Manager, open the Biometrics branch, right click the Secugen device and choose uninstall making sure you tick the **Delete** box before confirming.
 - ◆ Scan for new hardware which should pick up the driver automatically from Windows Update and the device will appear as 'SecuGen fingerprint device'.
3. Install .Net 6 Desktop Runtime (if not already installed) from the link below.

<https://dotnet.microsoft.com/en-us/download/dotnet/thank-you/runtime-desktop-6.0.8-windows-x86-installer>

OR

Follow the instructions in the app when it's opened and detects .Net 6 is not installed.

4. Install UserManager.msi (downloaded in step 1).

ADDITIONAL NOTES

For automated installation place a text file named `config.ini` in the same folder as the msi replacing `<<SQL SERVER\INSTANCE>>` with your server name and instance as per this template.

```
[Config]
Server=<<SQL SERVER\INSTANCE>>
Database=LiveRegister
SQLAuthentication=0
ValidateSQLServer=0
```
